REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-14 are allowed as the prior art, in particular Belser (US 6,643,082), Chainer et al. (US 5,757,574), or Yarmchuk (US 6,600,621), does not teach or suggest the applicant's invention. Claims 1, 5, and 11 teach a method and means for servo writing. Regarding claims 1-14, the examiner interprets independent claims 1 and 5 as "means-plus-function" claim(s) under 35 U.S.C §112, Paragraph 6. Claim(s) 1-14 are interpreted to cover the corresponding structure, material, or acts in the specification and equivalents thereof. Regarding claim 11-14, the distinguishing elements of the independent claim 11 teaches disk medium in which a pattern for position detection in a rotation direction is recorded moving the head to an innermost peripheral position on the disk medium; detecting the position of the head positioned on the disk medium the rotation direction based on the pattern for position detection read by the read head device; writing the servo pattern as a reference for one rotation in the position by the write head device based on a detected result by the detecting step, while the head is kept an innermost peripheral position on the disk medium; reading the servo pattern recorded on the disk medium by the read head device, and moving the head in the outer peripheral direction from the innermost peripheral position based on the servo pattern; and adding the servo pattern every rotation successively in the outer peripheral direction with the movement of the write head device. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
